

Figure 1 displays the color calibration target and the colorimetric analysis results for three specific color patches: PMS 485, PMS 349, and PMS Black. The top part of the figure shows the color calibration target, which consists of 30 color patches numbered 1 to 30. The bottom part of the figure shows the colorimetric analysis results for three specific color patches: PMS 485, PMS 349, and PMS Black. Each patch is shown with a color bar and a corresponding colorimetric analysis plot.
